# Electronic Publication

After considerable discussion we have decided that *Science & Christian Belief* will become an online only journal from the beginning of 2023 (from issue 35-1, which will be published in April 2023). We therefore anticipate that this issue 34(2) will be the last print issue. Subscribers will then access the content via the journal's website (https://scienceandchristianbelief.org/) in the usual way, where everything will appear in exactly the same format as it does at the moment. As soon as a new issue has been prepared, we will email all subscribers with the Table of Contents. We realise that this will be a difficult transition for some readers, so for those in the UK, we will offer to print and mail (or email) the article pdfs – please contact the Editor (k.r.fox@soton.ac.uk or by post c/o School of Biological Sciences, University of Southampton, Southampton SO17 1BJ) if you especially need personal print copies or if you have any other comments about this change. This move to online-only will save considerable costs for both printing and postage, and is similar to the practice of several major science journals. It will also save paper and help us to behave in an environmentally friendly and more sustainable fashion.

## Erratum

The Hebrew characters in Philip J. Senter's article in the previous issue (Apparent conflict between the Pentateuch and modern science: The early Church's solution, the solution's biblical origin, and ancient Christian approval of evidence-based reasoning. *Science & Christian Belief*, 34, p.7-28) were printed in the wrong order. These have now been corrected in the pdfs that are available online www.cis.org.uk/serve.php?filename=scb-34-1-senter.pdf. We apologise for any inconvenience that this error might have caused.

## Journal Reviews Editor

We are pleased to announce that Dr Todd Kantchev has agreed to become the journal's Reviews Editor when Meric steps down from this role at the end of 2022. Todd is a senior advisory consultant with degrees in computer science, medical physics and engineering, and has interests in theology. He has been actively involved with the Christians in Science local group in Bristol.

**Keith Fox is Editor of Science & Christian Belief, Emeritus Professor of Biochemistry in Southampton University and former Director of the Faraday Institute for Science and Religion in Cambridge**
